

### **RIGHT NOW IS THE TIME TO RE-EVALUATE YOUR CURRENT PAYROLL PROCESSOR**

PROXUS appreciates the opportunity to have spoken with you in the past about your payroll, and we believe there's no better time than right now to have another discussion about it.

In today's business climate we're all re-thinking every facet of our operations to be sure that we have the best processes and vendor relationships in place. In tough times, it's imperative to know that your critical vendor-partners are providing you with high value for your money, while looking for ways to streamline processes and find hidden savings through efficiency gains that ultimately translate to your bottom line.

For six years, [PROXUS](#) has helped over **450** payroll clients become even more efficient and independent. Here are some of the ways they've benefited from our help:

#### **Benefits to Working with PROXUS:**

- Moving from outdated, PC-based payroll applications to our robust Web-hosted payroll system gives PROXUS clients the flexibility to enter, review and retrieve information wherever they have access to the Internet. It also eliminates the need to use any internal IT resources for backup and recovery of critical and highly-confidential, personal information.
- Creating interface files for third parties such as insurance carriers and retirement plan administrators eliminates the need to have someone in your organization spend time on these non-productive tasks.
- Going Green - the majority of PROXUS clients have elected to receive their reports in an electronic format storing payroll reports chronologically on their PC. Eliminate the stacks of paper reports and binders and easily access and print only the reports you need right from your PC. Some PROXUS clients with nearly 100% Direct Deposit service have also chosen to deliver their employee's pay stubs electronically to eliminate additional paper, ink and delivery fee costs.
- Building custom General Ledger-interface files or reports for client's accounting systems makes recording payroll liabilities and expenses a non-event. PROXUS clients no longer have to hunt through several reports to arrive at their journal entries for payroll, further eliminating mistakes and freeing them up to work on more important tasks.
- Implementing an integrated Time & Labor Management system provides much better control over what actually gets recorded and paid to employees each payroll. As regulations have become more stringent and affect a growing number of employers, it has become imperative for clients to use a system to enforce compliance, eliminate errors in time recording, reduce payments to employees for non-worked time and to create an accurate audit trail. PROXUS can put a system in place, and will also review your current policies to be sure that they are compliant with current federal and state labor regulations giving you peace of mind.
- [Accessing one of PROXUS' Human Resource professionals](#) about any HR matter that may unexpectedly arise provides clients with answers and solutions without incurring additional costs. If you have an HR project that needs to be addressed, PROXUS would be happy to develop a proposal for your review and consideration.

If you're considering making a change in your [payroll processing](#) relationship, there's no better time than right now to meet with a PROXUS representative. We can help you determine how to improve your current payroll processes, while saving you time and money.

### **PROXUS RECEIVES PLATINUM AWARD FROM PAYCHOICE FOR OUTSTANDING PERFORMANCE AND GROWTH IN 2007-2008**

Prestigious award ranks PROXUS in top 2% of software developer's fastest growing licensees. [Read more...](#)
